SECURITY AND SOCIETY
BUILD YOUR RESUME THIS SUMMER

The Security and Society Summer School in Warsaw, Poland offers a range of courses taught in English and addressing global topics. Poland, one of the largest countries of this region, is particularly sensitive to security issues. Repeatedly invaded and even partitioned by its neighbors, it has also seen massive social, economic, political, and infrastructural change in recent decades. This makes Poland a fascinating case study to understand the pressing policy issues facing states in a rapidly changing global environment.
