

*“The books were crystals with recorded contents. They can be read with the aid of an opton, which was similar to a book but had only one page between the covers. At a touch, successive pages of the text appeared on it.”*

**-From Return from the Stars by Stanislaw Lem (1961)**

## THE FUTURE IN SCIENCE FICTION

### Join SRAS and Collegium Civitas

in Warsaw, Poland for a three-week exploration of the thin line between reality and fiction in literature, film, and gaming. We will look at science fiction from the perspectives of sociology, security, political science, and ethics. We will examine science fiction as a predictor and ponder its role in futurology and foresight. And we will consider recent trends in the genre itself, including design/prototype fiction.

### Lectures, Discussion, Workshops
